

Watch for Thin Ice

Remember, be aware of thin ice this time of year. Depending on changing temperatures, ice can form and melt to varying degrees on outdoor bodies of water. Please remind your child about the dangers of thin ice, obey all posted signs, take the proper care and remain a safe distance from the ice.

For more information about ice safety, visit the [Canadian Red Cross](#).

Did you know?

The colour of ice may be an indication of its strength. Clear blue ice is the strongest. White opaque is half as strong as blue ice. And, grey ice is unsafe—the greyness indicates the presence of water.
